

## R9.1 Programming Options

The R9.1 control system offers two easy but powerful ways for teaching your robot programs.

### EASY ‘Quick New Wizard’

Easy Pick and Place programs with options for reject, QC and degating routines. The Quick New Wizard leads the programmer through easy steps with video assistance questions.

### Powerful ‘Text Based Programming’

Powerful Text Based programming allows for a complete open programming platform. The Text base programming allows the user to program simple pick and place routines and more complex programs for downstream automation. A truly OPEN Program platform.
